Main objective of project is to develop A web application to manage the auction of football players and to manage the tournament. The auction of players will be carried in presence of authorized clients, who will bid for players to form their team.

After teams are formed, the application will generate the schedule for football tournament

In this application there are 3 types of user: Admin, Authorized and User mode.

- 1) Admin can create schedule, manage schedule and manage client
- 2) Authorized Client will be responsible for team formation. The auction of players will be carried in presence of authorized clients.
- 3) User can see the schedules of matches.
